

Application No. 10/797,352  
Preliminary Amendment

Customer No. 01933

Amendments to the Specification:

Please amend the paragraph at page 2, line 22 to page 3,  
line 7 as follows:

The other is a medical image photographing system for carrying out radiography in a doctor's round visits by utilizing a portable X-ray radiographing apparatus (transportable X-ray source) capable of being transported with the doctor's round visits to patients incapable of being imaged in the radiographing room such as the patient who is suffering from bone fracture, cerebrovascular or the like and the patient who is on being managed in ICU, and a portable cassette housing a phosphor plate (for example, refer to JP-Tokukai ~~2002-139888~~ 2000-139888). In this system, the cassette is inserted to a reading apparatus for the cassette after imaging, and the image is read.
